COMPUTER SCIENCE · VIT VELLORE

Sriram Kancherla

ML Engineer · Data Analyst · Student

Vellore, Tamil Nadu, India

Computer Science student at VIT Vellore. I build machine learning pipelines, analytics workflows, and deployed applications — with work spanning finance, healthcare, and cybersecurity.

01 —— ABOUT

Add a portrait
or browse files

CS undergrad at VIT.
ML & data analytics.

I study Computer Science at VIT Vellore (2023–2027) and focus on turning raw data into models and tools people can actually use — from training and evaluation through APIs, dashboards, and deployment.

EDUCATION

B.Tech in Computer Science & Engineering at VIT Vellore (Aug 2023 – Aug 2027). Coursework in DSA, OOP, NLP, and AI/ML.

FOCUS AREAS

Machine learning, data analytics, and finance — plus computer vision, NLP, anomaly detection, and full-stack ML apps with FastAPI and Docker.

GOAL

Ship impactful AI products in industry — combining rigorous ML engineering with clean, scalable software design.

LANGUAGES

English, Telugu & Tamil (native). Hindi & French (elementary).

---

02 —— EXPERIENCE

Where I've been building.

Academic research at NUS and an upcoming ML engineering internship at FlyRank AI — with verified credentials where available.

Jul 2026 — Aug 2026 · Remote · 8 weeks

Machine Learning Engineering Intern

FlyRank AI (FlyRank Corp.)

Accepted into the FlyRank AI Internship program as a Machine Learning Engineering Intern. An 8-week program (Jul 1 – Aug 26, 2026) focused on real-world ML engineering workflows, experimentation, and production-grade pipelines.

Machine Learning | ML Engineering | FlyRank AI

Jun 2025 · Singapore

Academic Intern

National University of Singapore (NUS)

Conducted exploratory data analysis on large-scale user activity and system log data to identify behavioral patterns and insider threat indicators. Built and evaluated a machine learning model for insider threat detection using Big Data Analytics and Deep Learning concepts, presenting findings under faculty supervision.

03 —— PROJECTS

Things I've built.

All | ML | Analytics | AI | Full-Stack

Feb 2026 — Present · ML, AI

Image Based Wafer Map Pattern Intelligence

End-to-end computer vision pipeline classifying silicon semiconductor wafer defect patterns using a CNN. Handles variable wafer sizes, legacy dataset formats, and evaluates performance with confusion matrices — tackling real ML engineering challenges in semiconductor yield analysis.

8+ Defect Classes · 80/20 Train/Test Split · Semiconductor Domain

Python · PyTorch · OpenCV · NumPy · Pandas · scikit-learn

Code

Dec 2025 — Present · ML, Full-Stack, Analytics

Ainvestify — Stock Insights

ainvestify.onrender.com

Full-stack stock analysis platform with ML-driven fundamentals scoring, news sentiment, and interactive charts. Live on Render — try the website for stock insights, comparisons, and an AI chatbot backed by production FastAPI endpoints.

4+ ML Models · 5 API Endpoints · Render Deployed

Python · FastAPI · XGBoost · TensorFlow · Docker · REST APIs

Code

Feb 2026 · AI, Full-Stack

Shiksha Sahayak

Full-stack learning platform running entirely on local infrastructure with a locally hosted LLM. Teachers upload study material to auto-generate worksheets and assessments; students interact with a context-aware AI tutor powered by FAISS semantic search and embeddings.

JWT Auth · FAISS Search · Local LLM Privacy

FastAPI · Streamlit · MySQL · FAISS · JWT · Firebase

Code

Sep 2025 — Nov 2025 · ML, Analytics

Healthcare Analytics — IITK D&G Capstone

Healthcare analytics project predicting 30-day hospital readmission risk using patient demographics, medical history, admission details, procedures, and discharge outcomes — helping hospitals identify high-risk patients and reduce avoidable costs.

30 days Risk Window · 6+ Data Sources · IITK D&G Partner

Machine Learning · Data Analytics · Python · scikit-learn

Code | Certificate

Aug 2025 — Oct 2025 · ML, AI

Insider Threat Detection

User Behavior Analytics (UBA) system using the CERT Insider Threat dataset. Fused logon, email, HTTP, file, and USB logs into a unified dataset, engineered behavioral features, and built a hybrid anomaly pipeline with Autoencoders, Isolation Forest, and LightGBM.

5 Log Sources · 3 Models · 120+ Features

Python · LightGBM · Autoencoders · Isolation Forest · UBA

NUS Certificate

06 —— CONTACT

Let's build something together.

I'm open to internships, full-time roles, research collaborations, and interesting projects in machine learning, data analytics, and AI engineering. Based in Vellore, Tamil Nadu.
